## KEY INGREDIENTS

\*Organic Rose Petals and  
Buds Powder

Rose is suitable for all skin types and offers amazing skin moisturizing properties for dry and sensitive skin. Rose works to moisturize, brighten and protect skin from water loss and airborne pollutants. The natural oils in rose petals trap moisture into skin cells, hydrating and moisturizing them. Rose is also useful to treat skin conditions such as rough skin, surface wrinkles and fine lines because it is high in antioxidants and helps the skin retain moisture. It also can be used to brighten the appearance of dark spots and blemishes. Because rose petals are high in vitamin C, they nourish and keep the skin strong. The regular use of rose petal powder for cleansing, toning and exfoliating tightens the skin and slows down signs of aging. The anti-inflammatory and anti-bacterial properties of rose water and rose oil can help ease your flare-ups and redness.
