### KEY INGREDIENTS

#### LOTUS

Lotus contains fatty acids, flavonoids, and proteins that help strengthen the skin's connective tissues and keeps the skin looking plump and smooth. The natural proteins help increase elasticity and strengthen the skin's structure. It also contains a natural hydroxyl acid and vitamin A (retinol) that exfoliates the external layer of the epidermis to health and glowing skin. Rich in antioxidants and potassium, lotus intensely hydrates the skin and restores the skin's natural complexion by increasing blood flow by reducing the rigidity and contraction of these vessels and eradicating fine lines, wrinkles and skin pigmentation. A wonderful ingredient for anti-aging skin care, as it restores and rejuvenates the skin leaving it healthier, firmer and much more radiant.

#### GINSENG

Ginseng is considered a strong anti-aging skin care ingredient to rejuvenate the look of the skin with its many phytonutrients. Ginseng is especially important for stimulating the proliferation of new cells. Building new cells in a timely fashion is the foundation for keeping skin firm looking toned and youthful complexion. Its antioxidant effects can help heal damaged, dry, or aging skin. Ginseng reduces puffiness, brightens under-eye circles, prevents wrinkles, may benefit acne, and boosts blood flow for a natural glow. As well as assisting in conditions such as rosacea and psoriasis to provide a huge boost to skin health. Activities include warming the skin to enhance micro-circulation, driving collagen synthesis to reduce wrinkles, reversing skin damage from overexposure to heat or UV light, and even directing healing to repair skin wounds.

#### COQ10

Coenzyme Q10 (CoQ10) helps to neutralize harmful free radicals that are one of the major causes of aging. Studies have shown that CoQ10 helps decrease wrinkles and increase skin smoothness by assisting in collagen synthesis and elastin production. CoQ10 is a naturally-occurring vitamin-like nutrient in the body that acts as a powerful antioxidant. It helps reduce free radical damage like that which occurs from UV rays. Inhibiting and minimizing oxidative stress is key for keeping the skin young and healthy.
