

SKINCARE CONCERNS

Enzyme powder is a cleanser great for sensitive skin types looking for a thorough, gentle cleanse with the added benefit of light chemical exfoliation. This ideal cleanser for sensitive skin use a combination of active enzymes — which naturally break down dead skin cells and other impurities — and fine, smooth powders to gently buff them away while you cleanse.

KEY INGREDIENTS

PAPAIN

Papain is a proteolytic enzyme extracted from the raw fruit of the papaya plant. Proteolytic enzymes help break proteins down into smaller protein fragments called peptides and amino acids. This is why papain is a popular ingredient in meat tenderizer. Papain helps help reduce acne by removing dead skin cells that can clog pores. Papain can also remove damaged keratin that can build up on the skin. This makes papain a cleanser to prepare skin to absorb nutrients.

ALLANTOIN

Extracted from the root of the comfrey plant, allantoin is a non-irritating ingredient that soothes and protects the skin. Allantoin's shortlist of skin soothing benefits include anti-inflammation and hydration for sensitive skin. Allantoin moisturizes the skin to prevent dryness and irritation. It is suitable for sensitive skin too because of its non-irritable nature. Allantoin helps in shedding dead skin cells as it softens, separates, and exfoliates dead skin cells.

INGREDIENTS

Zea Mays (Corn) Starch, Sodium Cocoyl Isethionate, Sodium Lauryl Sulfate, Sodium Palmitate, Sodium Lauroyl Glutamate, Diglycerin, Sodium Lauroyl Aspartate, Titanium Dioxide, Allantoin, Maltodextrin, Papain.

DIRECTIONS

Pour a small amount of powder into a bowl and add water to mix to a foamy consistency. With a brush, apply gently to the skin. After 5 minutes, wipe away with a steamed towel or pad.
